Cooperation written as co-operation in British English is the process of groups of organisms working or acting together for common mutual or some underlying benefit as opposed to working in competition for selfish benefit. Many animal and plant species cooperate both with other members of their own species and with members of other species.

This theory states that crime is less likely to occur in certain hot spots if there is a noticeable police presence. This theory was supported by a recent Sacramento Police Department study. Over a 90 day period from February to May of 2011, the Sacramento Police Department patrolled specific hot spot areas in Sacramento.

### Cooperation versus Conflict Management Theory in Practice

December 18th, 2019 - In my previous post I offered the theory that international institutions might serve conflict management functions. This proffer would allow institutions to more readily adapt and when adaptation fails a likely culprit could be recognized in a given crisis. This led me to consider what really was the difference between crisis.
